    The '90-'91 ARRL Repeater Guide (a pocket-sized book) skipped the So Calif.  
    listing of 2 Meter packet frequencies for some reason (intentional?  
    Northern Calif. and all other states were listed).

    Anyone know if the '92-'93 version has the missing So California packet  
    frequency information?

Is the '92-'93 version available now?

Yes the 92-93 version is out, and no I don't see a packet section for  
"Southern California".

Yes and So. California VHF is listed.

The Repeater Directory only lists information provided by area frequency coordinators. Perhaps the 2-meter coordinator for SOCAL either didn't supply information, or asked that it not be published.

>Anyone know if the '92-'93 version has the missing So California packet

Not sure, sorry.

73, Andy

To: packet-radio@ucsd.edu

Sometime around or after the middle of March (when my license arrives ???), I'd like to get into packet. I currently own an Alinco DJ-580T. I know that packet can be done on this radio, but is it practical? If yes, what are your suggestions (and cost estimates, if you have them)? If not, why not.

Thanks for your input.

Victor

By chance has anyone heard of Poor Mans Packet and is there a Poor Mans  
Packet for the Amiga... I have access to the detail for the IBM but that  
doe not help me with using it on an Amiga... If you have detail please  
respond.

If someone has some information about wormholes, please post.  
I'm interested in this stuff too.

Thank you very much.

P.S.: On which ftp-server can I find the most recent faq-file about packet?
